

## Release Notes E-Z Frame Platinum 2.0.6.9

### Major Highlights

E-Z Frame Platinum Edition 2.0.6.9 is a bug fix/enhancement release for all versions of E-Z Frame Platinum.

In addition to bug fixes/enhancements, this release includes the following major change(s):

- Inclusion of all Microsoft released updates for MSDE 1.0 (v7.00.623) - Service Pack 4 (v7.00.1063) with Security Updates MS03-031 (v7.00.1094) and MS08-040 (v7.00.1152) addressing specific issues that were discovered in the Microsoft Data Engine (MSDE) 1.0 since its ship date.

Note that the downloadable web 2.0.6.9 update for E-Z Frame Platinum (file name: SP6\_9Update.exe) does not include these updates, as they are for the acting server system only. If updating an existing installation or multiple installations of E-Z Frame Platinum Edition please download and install this update (file name: msde1.0u-sp4.exe) on the system acting as the database server.

### Bugs fixed/enhancements made in E-Z Frame Platinum 2.0.6.9

E-Z Frame Platinum 2.0.6.9 resolves several bugs and has numerous enhancements made, this is a partial list (since not all bugs/enhancements are deemed major):

- **51 – Insurance Claims:** Clicking the option to print while having no printer installed crashes E-Z Frame Platinum to the Desktop.
- **65 – Insurance Claims:** Adding an invoice that has previously been added to an existing HCFA Claim crashes E-Z Frame Platinum to the Desktop.
- **72 – Patient Records:** Edit functionality missing from Referral Physician Information dialog.
- **73 – Insurance Claims:** Box 24 only displays up to six line items.
- **76 – Insurance Claims:** Box 24 scroll bar present, however, scrolling not enabled outside of Edit mode.
- **78 – Patient Records:** Patients Birth Date, if changed, does not update the Insured's DOB under their added Insurance Policy/Polices.

- **83 – Configure Providers:** Adding a New Provider and attempting to save without entering a User Name and/or Password results in continual errors requiring the user to cancel out of the process.
- **85 – Patient Records:** Insured's DOB and Gender under a newly added Insurance Policy/Polices is incorrect when compared to the information entered into the Patient Record.
- **103 – Configure Application:** The "Non Standard Printer" option, when checked, causes various fields on a HCFA Claim to either print incorrectly or not print at all.
- **125 – Insurance Claims:** When Adding a New Insurance Claim and using an invoice where a balance was transferred from the Patient to Policy Box 24 has no line items listed.
- **126 – Insurance Claims:** Boxes 24I, 32B and 33B are missing some Qualifiers.
- **128 – Patient Records:** Saving a newly created Patient Record or after editing an existing Patient Record crashes E-Z Frame Platinum to the Desktop.
- **130 – Insurance Claims:** Saved HCFA Claims, upon being reopened, display no line items.
- **132 – Reports:** Total Payments mismatch between Daily Transaction Report and the MTD Sales Report.
- **133 – Insurance Claims:** Box 32 reverts all fields back to their original value after editing and then saving an existing HCFA Claim.
- **135 – Insurance Claims:** Box 33B does not reflect the selected Qualifier.
- **136 – Ledger/Reports:** Aging All Accounts Receivable Report indicates a \$0.01 balance for a Patient while the Patient Ledger indicates a \$0.00 balance.
- **137 – Configure Practice Info/Insurance Claims:** Organizational NPI entered is not saved and does not appear on newly created HCFA Claims.
- **138 – Insurance Claims:** Box 28 and 30 display incorrect values after deleting a line item or multiple.
- **139 – Insurance Claims:** Previously deleted line items reappear on a HCFA Claim after deleting the last line item and cancelling the changes made.
- **141 – Insurance Claims:** Box 32 now allows all fields to be cleared if needed.
- **142 – Insurance Claims:** Box 32 formats facility address incorrectly.
- **143 – Sales/Insurance Claims:** A new Sale that has had the Invoice Date altered before its completion results in an incorrect

Date(s) of Service on a HCFA Claim of which that invoice has been added to.

- **146 – Patient Records/Rx Prescriptions:** Rx Prescriptions added through a Patient Record are unable to be printed.
- **147 – Reports:** Provider Productivity By Person Report displays values under both the Patient and Insurance Total columns of which, when added, differ from the value under the Amount column.
- **150 – Patient Records/Ledger/Reports:** Patient balance observed within the Patient Record does not match the balance observed on the Patient Ledger and/or an Aging All/Aging Patient Accounts Receivable Report.
- **151 – Reports:** Provider Productivity Reports do not display the full value(s) if value(s) exceed eight digits under the Discount and Insurance Total columns.
- **152 – Patient Records/Sales:** Clicking the option to "Continue" within the Sale Detail dialog on a Sale generated from a Patient Record crashes E-Z Frame Platinum to the Desktop.
- **154 – Insurance Claims:** Box 32B and 33B qualifier fields do not retain blank selection(s) after saving the HCFA Claim.
- **155 – Insurance Claims:** Date(s) of Service in Box 24A displays the current date under both "From" and "To" where "From" should display the date of which the invoice was created.
- **156 – Insurance Claims:** When multiple line items exists the ordering in Box 24 changes after altering the Date(s) of Service under "To" on one or more line item.
- **157 – Insurance Claims:** Blank qualifier selection in Box 32B does not clear the Group Number after saving the HCFA Claim.
- **158 – Insurance Claims:** Batch delete functionality missing from Insurance Claim List.
- **159 – Rx Prescriptions:** "Employee: This field is required and has been left empty" error if non-required Employee field is left empty.
- **163 – Lab Orders:** The Employee name disappears after saving a Lab Order.
- **164 – Insurance Claims:** Creating a new Patient Record, generating an Rx Sale for the patient and adding a HCFA Claim for that invoice in sequence crashes E-Z Frame Platinum to the Desktop.
- **165 – Insurance Payments:** Line items from an added invoice to an existing HCFA Claim do not appear on the HCFA Claim when going to distribute payments.

- **186 – Insurance Claims:** The HCFA export function fails to export a claim (or claims if batched) to a text (.txt) file if no printer is installed.
- **197 – Insurance Claims:** Editing an existing HCFA Claim and leaving Box 5 blank crashes E-Z Frame Platinum to the Desktop.
- **208 – Insurance Claims:** Deleting a HCFA Claim or Claims from the Insurance Claims List automatically refreshes the list.
- **230 – Sales:** "COPY" marking is no longer printed when printing the original receipt of a past invoice.
- **283 – Patient Records:** Referral Information dialog displays "AB" as the Referring Physicians State after selecting a Physician from the list.
- **284 – Lab Orders:** Application hangs when copying a Lab Order.
- **288 – Insurance Claims:** Box 24A, when editing a HCFA Claim, the calendar defaults to September 2007.
- **295 – Ledger/Reports:** Transferring a balance from Policy to Policy creates a balance mismatch between the patients Ledger and the Daily Transaction Detail Report.
- **296 – Rx Prescriptions:** The Employee name disappears after saving an Rx Prescription.
- **298 – Lab Orders/Sales:** Generating a sale from a non-invoiced but copied Lab Order results in a message reading "An invoice has already been generated for this Lab Order" if the original Lab Order has been invoiced.
- **299 – Insurance Claims:** Box 4 incorrectly populating Insured's Name.
- **316 – Ledger:** Deleting Transfer Reasons crashes E-Z Frame Platinum to the Desktop.
- **322 – Rx Prescriptions:** Provider user account unable to save an Rx Prescription.
- **337 – Rx Prescriptions:** Saving an Rx Prescription without selecting an Employee crashes E-Z Frame Platinum to the Desktop.
